FLYSPY
MASTERTRONIC

SCREEN SHOTS
MANUFACTURED IN THE U.K.

Long, long ago, in another world and time (Scunthorpe 1983) lived a wicked and nasty little man, who happened to be the resident evil professor. His favourite hobby was jumping up and down on small furry animals in boots. (Him, not the animals). We are talking *evil* here!

Take the heros role and put an end to his wicked ways in the most amazingly, graphically, twisted, warped and mind blastingly *odd* computer game ever devised. Guaranteed to defeat the best! It will out-weird you ... Joystick advised.

This game is the entire fault of Richard Aplin. Nervous breakdowns caused by playing it are all his doing. Not Ours.
